VISION
Every young person’s future unfolds uncompromised by systemic injustice.

MISSION STATEMENT
We catalyze equitable social change by expanding the impact of youth-serving organizations, and building an effective community of engaged philanthropists.
Together, we’re working for better futures.
Over the next three years, SVP MN will work towards reaching the following outcomes:

**All SVP programs and practices are centered on catalyzing equitable social change.**
We will operationalize the principles of diversity, equity and inclusion in all of our programs, policies, and practices which will advance our work in becoming an anti-racist organization. We will engage in mutual discovery and shared learning with our Twin Cities community to address systemic issues that impact youth.

**SVP has more and deeper relationships with our Investees and the broader community.**
We will deepen relationships with our Investees and work more collaboratively with individuals and organizations in community to expand our work towards systems change. We will amplify youth voice within our organization, in our communications, and in the decisions we make.

**SVP has built an effective community of engaged philanthropists who bring a diversity of experiences, talents and resources to the work.**
We will co-create a continuum of opportunities with and between our Partners, Investees and the community that will more effectively grow and engage philanthropists while also evolving the role of philanthropy. This will ensure that we provide programming that is responsive to current events and that will address SVP’s long-term goals.

**SVP organizational and financial model is sustainable and advances our mission and values.**
We will optimize our organizational structure to leverage a diverse array of financial resources to ensure our sustainability. We will identify and measure expected outcomes for all SVP efforts that are meaningful, achievable and defined in partnership with those closest to the work.

Thank you to the SVP Partners and community stakeholders who helped inform our new mission, vision, and strategic direction.
